Since I do a lot of doodling thinking up new design ideas, I needed an accurate method of drawing track plans. I made templates drawn to scale that could be printed featuring a grid and mainline tracks. This makes it easy for sketches to be made that are quick and close to scale.

The drawing to the right shows just one of the module templates - an HO scale 2'x4' module. I have included the 2'x4' and 2'x6' templates here in PDF format on the next couple of pages as a useful guide to what you will find in the book.
